

We Ship A Wide Variety Of Agro Products

About PVC AGRO

PVC Agro Export is one of the trusted global leaders of fresh fruit, spices, vegetables, and grains.

Our export network is widely connected and that made us established a great reach to our customers. Though all our products are premium quality, we have high demands for some specific products like onion, garlic, chilli, coconut and fresh vegetables.

For a quality assured production, Bayer Crop science and PVC agro export have entered into partnership to produce the top quality vegetables as per the standards of global market.

PVC Agro Export is a global representative of agricultural products. Our main goal is to create a trusted trading environment for the importers and vendors to ensure trade in a smooth and professional manner. Our organization offers a wide range of premium quality agro products that can be availed both in domestic and the international market.

VISION

Our vision is to achieve trust and recognition as a global leader in the industry of agro exports while providing the quality products and a hand towards sustainability in agricultural sector of India.

MISSION

Our mission is to delight our consumers worldwide by providing high quality organic and fresh agro products. We ensure to fulfill the requirements of inline commitments with regards to product excellence and well-timed shipments.

QUALITY

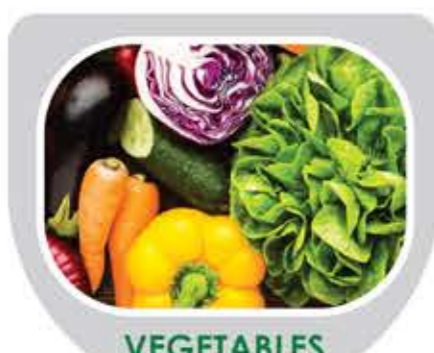

We, at PVC Agro, ensure that our customers get the premium quality as per the global standards. Our superior quality has provided us the strength to make ourselves confident about our organization.

For the matter of quality check at our company, it is carried out by the experienced industry experts who have been following the tradition of agriculture. As we are the believer of traditional agriculture and technology, we have managed to balance both of them to offer you not just the quality but also quantity at its par. We take enormous pride on our world class standard of agriculture practices with no space for the omission and inaccuracy.

SERVICES

Hygienic Cleaning

All our food products are properly cleaned using pure water through machinery or hands. They are well dried by using cloth and wind before packaging.

Packing

Packing is done as per the requirements of our customers. We primarily choose the packaging that promotes an enhanced shelf-life of our products for keeping freshness intact.

Grading

First and foremost is to pick the quality products. Sorting and grading of the products take place through latest technology. After this process, products are manually monitored by our quality controllers.

Labeling

Printing and labeling are usually prepared by us as per customer's choice. Depending on the requirements, we do offer labeling with our brand name and a bar code.
